DETAILED ACTION

Oath/Declaration

The oath or declaration submitted 11/12/2004 is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02. The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The originally submitted Oath recites the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56(a), rather than 37 CFR 1.56.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The specification has been amended as follows:

On page 1, after the title of the application, please insert the following:

--This application claims priority to Application Nos. JP 2003-80113, filed 3/24/2003, JP 2003-80114, filed 3/24/2003, and JP 2003-423434, filed 12/19/2003.--

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the nearest prior art, Howland et al, discloses a method of producing paper comprising an additive made by reaction of a carboxylic acid with a polyamine to form products having amide moieties, but no tertiary amine moieties. Other prior art, Drach et al (4720383), discloses a process of treating cellulose pulp by adding the reaction product of a carboxylic acid and a polyamine made using two step reaction sequence to produce imidazoline moieties, which comprise tertiary amines. Drach et al then quaternizes the imidazoline moieties to convert the tertiary amine to a quaternary amine (col 5, lines 15-67). There is no disclosure or suggestion in the prior art to make paper by adding the claimed reaction product comprising tertiary amine moieties that have not been quaternized.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis Cordray whose telephone number is 571-272-8244. The examiner can normally be reached on M - F, 7:30 -4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
